

Methods tested with Postman

1. POST – <http://localhost:4500/registration> - REGISTRATION

Tested registration with email and password. The examples used where the email test.test@info.uaic.ro and password “test”. **OK.**

2. POST - <http://localhost:4500/confirmregistration> - CONFIRMREGISTRATION

Tested confirm registration with the received token (**confirmToken**). The received token was 65810611362317621840. **OK.**

3. POST - <http://localhost:4500/login> - LOGIN

Tested the login function with the email and password from above. No problems where encountered after register, confirm registration and login. **OK.**

4. GET - <http://localhost:4500/userinfo> - USERINFO

Tested to retrieve informations about a respective user. **OK.**

5. GET - <http://localhost:4500/profesorlist> -PROFESORLIST

Tested to extract the professor list . **OK.**

6. POST - <http://localhost:4500/recordlicence> -RECORDLICENCE

Tested to record a license specifying the name of license : “licenta in ceva”, id of professor “1” and the description license. After all the parameters were specified, no problems were encountered on recording licence.

OK.

7. POST - <http://localhost:4500/getStudentGrade> - GETSTUDENTGRADE

Tested to get the grade from the students with id 1 and 2. **OK**

8. GET - <http://localhost:4500/getCommitteList> - GETCOMITTELIST

Tested getCommitteList to list all the committe available. **OK.**

9. POST - <http://localhost:4500/getProfsFromCommitte> - GETPROFSFROMCOMMITTEE

??? Tested getProfsFromCommite to display the proffesors from the specified committe.

OK.

10. GET - <http://localhost:4500/getProfsWithoutCommitte> - GETPROFSWITHOUTCOMMITTE

Tested to show all the proffesors who aren’t in a committee. **OK.**

11. POST - <http://localhost:4500/moveProfToCommitte> - MOVEPROFTOCOMMITTE

Always when running the response was “false”. The action was never completed for moving a professor to a committee. NOT OK.

- POST - <http://localhost:4500/getEvaluateStudentsByCommitte> - GETEVALUATESTUDENTSBYCOMMITTE

Methods tested with Postman

Tested this method and was ok, for the specified id, the respective students were displayed.

OK

12. POST - <http://localhost:4500/profNote> - PROFNOTE

??? – Wasn't able to list anything from this method, very weird expectation. **NOT OK.**

13. POST - <http://localhost:4500/getStudentGuided> – GETSTUDENTGUIDED

When specifying the id, there were displayed the informations about the students guided by the respective id. **OK**

14,15,16. All 3 last methods (**POST** methods – insertStudentToListProf, deleteStudentToListProf, modifyDate) were tested with examples , getting a true response, but nothing was modified in Database. This might be weird, need to see what's the answer from frontend when

Interacting with these methods. **NOT OK.**

7. POST - <http://localhost:4500/clientListPage> - CLIENTLISTPAGE

Tested to change the parameters pagenumber and pagesize. After setting them to different values everything resulted to be ok. **OK**

Conclusion : From all the methods tested, 13 methods resulted with successful tests and 5 of them resulted with unexpected/fail results.
